PROFESSIONAL EXPERIENCE

Software Engineer Level - 1

Consultadd Inc | 2022 – Present

- Developed a full-stack project using Serverless Framework, NodeJS, React and React Native/Expo, with a focus on accessibility. Leveraged AWS services including Amplify, Cognito, RDS, Lambda, S3, and API Gateway.
- Contributed to other projects utilizing Django, Pytest, and Django Rest Framework (DRF).

MERN Flutter Intern

Hope Foundation | March 2021 – Nov 2021

- Managed both back-end and front-end aspects of development process.
- Developed an Android application using Flutter.
- Created a Node.js backend and React.js admin panel.
- Utilized MongoDB for database management.
- Integrated Firebase for notifications and file handling.
- Implemented PayU Money for payment processing.
- Designed a token-based queue management system using QR codes.
- Integrated Cowin APIs for vaccination registration.
- Used Mobiwik API for mobile recharge, bill payments, and e-wallet functionality.

Python Django Intern

Universal Informatics | May 2020 – Jun 2020

- Gained proficiency in Python, including core and advanced concepts.
- Learned about file handling, exception handling, and OOP principles.
- Worked with various Python modules and libraries.
- Explored web development with Django, including creating web applications.
- Familiarized myself with Django's Admin panel, session management, DTL, and MVT architecture.

ACHIEVEMENTS

- President Of College Council
- CodeChef College Chapter Representative
- Technical Lead Coding Club MGI
- 2 Star CodeChef

PROJECTS

ALAN NEWS - Web Application | ReactJS | Alan AI API

- This is a voice-operated news application. You can access articles by simply giving voice commands to the AI, such as "Show articles on Technology."
- It can read article headlines aloud and open the full articles in a separate page.

EXPENSE TRACKER - Web Application | ReactJS | Speechly API

- It allows you to manage your income and expenses using voice commands.
- It also displays expense data in chart format for easy visualization.

INSTAGRAM AUTOMATION | Python, Selenium

- Automate Instagram to perform operations like counting the number of posts, followers, and following of a user or any page.
- It also provides a list of followers and following.

SONG TRACKS FETCHER- Web Application | ReactJS

- This is a React application that displays the top 10 tracks in a country along with their lyrics.
- Users can search for tracks by artist or track name.

Linkglobe - Social Media Application | Python | Django

- Linkglobe is a social media app where you can meet new people and make friends.
- You can create posts, chat with friends, share stories, play games, check COVID stats, and sell old products.

MEAL APP | Flutter

- You can search for meals from various categories and apply filters like "Only vegetarian."
- You can mark dishes as favorites for easy access.
- The app provides detailed descriptions on how to cook each dish, including ingredients and step-by-step procedures.
